

Aurora Networks and Kaltura Deploy Next-Generation Cloud TV Platform at Bouygues Telecom

Sep 08, 2026

Aurora Networks partners with Kaltura to help modernize Bouygues Telecom's legacy IPTV platforms for its mobile and fixed customers

- Bouygues Telecom brings OTT and IPTV streaming options to its customers with a deployment from Aurora Networks
- Kaltura's Cloud TV platform delivers modernization with Aurora Networks leading design and custom software development for implementation

RICHARDSON, Texas--(BUSINESS WIRE)--Sep. 8, 2026-- Aurora Networks, a business of [Vistance Networks](#) (NASDAQ: VISN), a global provider of intelligent network solutions, and Kaltura (NASDAQ: KLTR), the Agentic Digital Experience company, today announced the deployment of a new Cloud TV platform at Bouygues Telecom, a global French telecommunications and digital services operator.

This press release features multimedia. View the full release here: <https://www.businesswire.com/news/home/20260908179653/en/>

Bouygues Telecom is deploying the Kaltura Cloud TV platform as part of an on-going project to modernize the company's legacy video platforms and support next-generation, state-of-the-art IPTV streaming options for its customers. Aurora Networks™ acted as the lead systems integrator on the project, providing consulting, design, project management, integration, and custom software development to implement the solution.

The project enables Bouygues Telecom to gather the video backend functions on a single, unified platform. Kaltura Cloud TV is currently live, providing best-in-class IPTV experiences to all Bouygues Telecom TV viewers across STBs, Mobile and Smart TVs. Bouygues Telecom currently has 5.5 million fixed network customers and 27.4 million mobile customers.

"This new Cloud TV integration project continues our close relationship with Aurora Networks' Video Professional Services team," stated Isabelle Jallat, head of platform services for Bouygues Telecom. "Thanks to our successful collaborations with Aurora Networks, we were confident that Aurora Networks' team of experts would help to integrate Kaltura, our new Cloud TV platform, into our remaining video delivery platforms seamlessly, while also ensuring any new product functionality is launched quickly."

The Kaltura Cloud TV integration project continues Aurora Networks 18 years collaboration with Bouygues Telecom. This project leverages the Aurora Networks Video Professional Services team's IP Video Migration services, which helps video service providers profitably transition to IP video.

"Aurora Networks has worked with Bouygues Telecom and Kaltura for many years, and we're thrilled to continue our collaboration as we work together to deploy the new IP video platform," stated Chris Brown, vice president, global video systems, Aurora Networks. "Aurora Networks utilizes our unique knowledge and decades of video expertise to create solutions that are optimized for our customers' needs and include a single point of ownership from design to implementation."

"Kaltura is proud to partner with Aurora Networks to serve Bouygues Telecom's TV transformation," said Natan Israeli, chief customer and commercial officer at Kaltura. "Through Aurora Networks professional services capabilities and Kaltura's Cloud TV product, we were able to provide unique synergies that support the execution of Bouygues Telecom's business strategy, and we look forward to continuing our partnership with Aurora Networks on similar projects around the globe in the near future."

In addition to the Systems Integration Services provided to Bouygues Telecom, Aurora Networks Video Systems provides to its customers flexible ad insertion and IP video solutions—helping video service providers generate revenue from advanced advertising and personalize the user experience. As a leader in IP Video Ad Insertion, Aurora Networks delivers more than 60 billion ads per year across millions of video subscribers.
